

## Ross 780 Mk 3

This well maintained & presented example of these well known trailer sailers was launched in December 2003. It has raced with some success & extremely comfortable to camp out in as we have done on a number of times. It is fitted out with Ronstan & Navman gear.

This Yacht has a galley kitchen down the port side with a fully enclosed shower & head compartment. It has opening portholes above the stove & head. The sails are a combination of Doyle Frazer & Quantum. It sits on a standard Ross trailer & has an electric winch.

This trailable yacht provides full 6ft headroom in all cabins & has a large rear & Vberth.
